

AMBITION FOR A BETTER LIFE

KEY FEATURES

SAUR

Water for the future

Saur is a leader in contracted management of water services in France. **It operates at every stage in the water cycle**, providing acknowledged expertise to local authorities and industry alike. Within its core business, Saur aims to strike a harmonious balance between the work entrusted to it and the need to preserve the equilibrium of the natural environment.

Internationally, its products and services are aimed at optimizing the performance of water and wastewater services through public-private partnerships, and to design treatment facilities adapted to local needs.

SKILLS

- Production, treatment, distribution and management of drinking water services,
- Wastewater treatment,
- Processing and disposal of treatment by-products: sludge, grease and sand,
- Pipeline construction and rehabilitation.
